Cambridge Structural Database (CSD)
Please use Internet Explorer, Mozilla Firefox or Safari

IMPORTANT: DOES NOT work with Google Chrome & Microsoft Edge. ✗

Cambridge Structural Database (CSD) uses Java JRE. You may have to use an option to allow the plugin to Enable/Always Activate/Allow Always.

Internet Explorer: Go to Internet Options and look for the tab called programs. Then look for manage add-ons button. From here you can enable or disable the java plugin.
Firefox: Open the add-ons manager (Ctrl-Shift-A). Then click "Plug-ins" to make the changes needed. (Set Java to Always Activate) Version 52 does not work w/ Cambridge.

Safari: Open Preferences. Click on Security. Click on Internet Plug-ins---Website Settings. Look for Java and select allow always.
